

WELDING TRAINING

Narrative Summary:

OSTTC has a unique approach to Welder Training based on the needs of the student entering the welding field. In order for the student to get a firm grasp on entry level welding, our training programs are designed to teach proper welding skills and instill good work ethics. This course involves various types of welding, to ensure the knowledge and proper skills needed to obtain the All Position welding tickets. Training is achieved through theory and hands on experience.

Admission Requirement:

Require formal interview with Trades Co-coordinator
Preference for grade 12 or equivalent, must be 18 years of age or older
Willing to travel for employment and must have reliable transportation

Course Outline and Information:

Theory and practical work include preparation for:

- Shielded Metal Arc Welding (SMAW)
- Flux Core Arc Welding (FCAW)
- Gas Metal Arc Welding (MIG)
- Oxy-Acetylene Cutting and Plasma Cutting

Additional classes include:

- Workplace Hazardous Materials Information System [WHMIS]
- Introduction to Health and Safety Training
- A basic introduction to Welding Theory and Practices
- Introduction to Blueprint Reading and Welding Symbols

Full-time participants in the program are provided with: welding helmet, gloves, chipping hammer, wire brush and a welding jacket.

Hours and Duration:

Eight [8] week program, Monday to Friday 9:00 am to 4:00 pm
Note: part-time and evening courses may be considered if enrolment is substantial
